ASHWINI DHANAJI MANE

Python Full Stack Developer

ashumane2005@gmail.com | +91-9730640093

LinkedIn: https://linkedin.com/in/ashwini-mane05 | GitHub: https://github.com/ashumane-crypto

PROFESSIONAL SUMMARY:-

Aspiring Python Full Stack Developer with hands-on experience in building scalable web applications using Python, FastAPI, React.js, SQL, PostgreSQL, and Firebase. Skilled in REST API development, authentication, database design, CRUD operations, and responsive web development. Passionate about solving real-world problems through clean, maintainable code and continuously learning modern software engineering practices.

TECHNICAL SKILLS:-

Programming: Python, JavaScript, SQL | Frontend: React.js, HTML5, CSS3 | Backend: FastAPI, Node.js, REST APIs |

Database: PostgreSQL, MySQL, Firebase | Tools: Git, GitHub, VS Code

PROJECTS:-

1) AI-Based Smart Farming Assistant (Python, React.js, Node.js, Firebase)
Developed a full-stack web application for sugarcane farmers with secure authentication, real-time data management, and a responsive user interface. Integrated Firebase Authentication, Realtime Database, and an AI chatbot to provide crop recommendations and farming guidance. Implemented API integration and database management to simplify farmer registration, crop information, and digital farming services.

2) Medicine Tracker (Python, FastAPI, React.js, PostgreSQL)
Developing a full-stack medicine management system using Python, FastAPI, React.js, SQL, and PostgreSQL for medicine scheduling, reminder tracking, and patient management. Designed RESTful APIs, implemented authentication, CRUD operations, and a relational SQL database for secure storage of patient, caregiver, and medicine records. Building a responsive dashboard with planned features such as medicine interaction alerts, notifications, and AI-powered healthcare assistance.

3) Stock Price Prediction System (Python, Pandas, NumPy, Scikit-learn)
Developed a stock price prediction application using Python by performing data preprocessing, feature engineering, and exploratory data analysis on historical stock market data. Trained and evaluated machine learning regression models using Scikit-learn with performance metrics such as MAE and RMSE to improve prediction accuracy. Visualized stock trends and prediction results using Matplotlib to support data analysis and better interpretation of model performance.

EDUCATION:-

B.Tech Computer Science Engineering (Expected Graduation: 2027)
Adarsh Institute of Technology and Research Centre
HSC: Adarsh Junior College Vita | SSC: Shriram Vidhyalay Mhasurne

CERTIFICATIONS:-

GeeksforGeeks - Python | Web Development Internship | Outskill - Generative AI | Google Cloud - Cloud Computing | YBI Foundation - Data Science & ML Internship

ACHIEVEMENTS:-

• Winner - PixelFusion District-Level Technical Event • Qualified Python Assessment - Javik Labs (43/50) • Built multiple academic Full Stack & AI projects
